

Corporate social responsibility policy (MVO –CSR)

PURE BUSINESS is the highlight of our vision

Pure business is all about respect and sustainability for us. Respect for the person behind our customer. Respect for the world we work in. Respect for the people we work with. Respect for our promises: a given word is a given word.

Here at Morubel we believe that all our employees, also the people working in our supply chain, need to be treated in a respectful way. The labor laws need to be respected as defined in the BSCI code of conduct.

All our employees must act in an ethically correct way. Respect, liability and integrity are the fundamentals of our company. Integrity includes avoiding each form of corruption and bribing.

We take a leading role in the sustainable development of the shrimp fisheries and aquaculture. We are actively involved in MSC, BIO, Naturland, GLOBALG.A.P. and ASC.

We aim to be a financially healthy company, an important factor regarding our mission and our employees well-being, satisfaction of our stakeholders and creating a win-win situation with our customers and suppliers.

Because we believe in **PURE relations**.
